

UniClean-S™ Blade Holder

The patented UniTrak™ slide out feature is integrated into the tube tray. This provides for easier maintenance, rapid replacement of tubes, and convenient upgrades to the holder.

Overview

Features

- Stainless steel and composite construction
- Standard KF or DST style blade retention
- Integrated slide-out feature
- Conforms to the roll at lower pressure

Benefits

- Unidirectional composite or stainless steel top plate
- Uniform cross-machine pressure distribution and roll surface cleaning
- Patented slide holder removal for quick tube replacement and general holder maintenance
- Cross-machine flexibility, machine direction rigidity
- Sealed against contaminants without external components
