

SynTek™ C Doctor Blades

Combines advantages of all carbon construction with SynTek doctor blade technology utilizing a high performance engineered resin system:

- Lower friction – energy saving
- Longer life
- Improved cleaning
- Improved bevel wear integrity

Overview

Features

- All carbon construction
- Enhanced high performance resin system
- Maximum temperature: 365°F (180°C)
- Available thicknesses: 0.055" (1.4 mm) to 0.075" (1.9 mm)

Benefits

- Energy efficient due to low coefficient of friction
- Long blade life equals low maintenance
- Excellent roll cleaning

Applications

- Ceramic press rolls, dryers, and calenders
