

Repair Services

Technical service is one of the greatest strengths of Kadant Solutions and is part of our customer commitment. Supplying superior products isn't enough. Fast, efficient repair service is essential to smooth-running, profitable process manufacturing operations. Often the extent of any damage is unknown until repair work is started.

The Kadant Solutions repair services team is dedicated solely to answering equipment repair needs—quickly, conveniently, and thoroughly. The self-directed team of technicians have years of experience. When requested, consultation and estimates can be provided before any repairs are performed.

Reducing downtime is critically important to any process manufacturer. Expect fast response from the Kadant Solutions repair services team. Repairs will be complete using Kadant Solutions genuine parts.
