

Yankee Dryer Cleaner™ Device

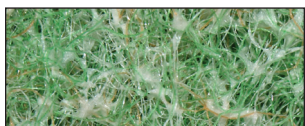

Regular Yankee dryer surface cleaning during downtime is important. Removing coating is even more critical if chatter marks are developing, which can migrate across the face and into the Yankee surface. The Yankee dryer cleaner device is lightweight, easy to handle, and requires minimal manpower. There are a variety of application specific pads available for cleaning and polishing the Yankee surface. When used regularly, it can act as an effective chatter management device and prevent the need for Yankee grinds.

N8130 Black
80-150 grit equivalent

N8133 Blue
180-220 grit equivalent

N8132 Green/Amber
200-300 grit equivalent

Overview
